## Company Highlights

### Corporate Objective

To deliver long-term capital growth, while preserving shareholders' capital; to invest without the constraints of a formal benchmark, but to deliver for shareholders increases in capital value in excess of the relevant indices over time.

### Investment Policy

To invest in a widely diversified, international portfolio across a range of asset classes, both quoted and unquoted; to allocate part of the portfolio to exceptional managers in order to ensure access to the best external talent available.

### Performance Since Inception

<sup>1</sup> Diluted net asset value per share with debt held at fair value.

<sup>2</sup> Retail Price Index.

<sup>3</sup> The MSCI All Country World Index (ACWI) we have adopted is a total return index and is based on 50% of the ACWI measured in Sterling and 50% measured in local currencies.

<sup>4</sup> The ACWI in the chart is based on the capital-only index in Sterling prior to the introduction of total return indices in December 1998. Thereafter we have used the total return index based on 50% of the ACWI measured in Sterling and 50% measured in local currencies.

## Chairman's Statement

---

**Lord Rothschild, OM GBE**

Your Company's net asset value at the end of June had risen to 1,784 pence per share, representing a total return, including the 16 pence interim dividend, of 4.0% for the half year. Over the last three years, the NAV return stands at 34.9%, with shareholder returns of 52.9%.

Results for the half year reflect the performance of your Company's quoted equity portfolio, both from individual stocks and external managers, while an increased allocation to Absolute Return & Credit contributed. The private investment portfolio has benefitted from a number of cash distributions from external managers, together with underlying growth in the value of some of our directly held investments. Offsetting these results in Sterling terms, has been the effect of our diversified currency holdings at a time when Sterling appreciated against the US Dollar, following its decline after the Brexit vote. As of now, our currency holdings are spread mainly between Sterling, the Dollar and the Euro.

We do not believe this is an appropriate time to add to risk. Share prices have in many cases risen to unprecedented levels at a time when economic growth is by no means assured. The S&P is selling at 25 times trailing 12 months' earnings, compared to a long-term average of 15, while the adjusted Shiller price earnings ratio, which averages profits over 10 years, is approximately 30 times. The period of monetary accommodation may well be coming to an end. Geopolitical problems remain widespread and are proving increasingly difficult to resolve. We therefore retain a moderate exposure to equity markets and have diversified our asset allocation towards equity investments where value creation is driven by some identifiable catalyst or which are exposed to longer-term positive structural trends. We have a particular interest in investments which will benefit from the impact of new technologies, and Far Eastern markets, influenced by the growing demand from Asian consumers.

## Chairman's Statement

---

As the 'Fourth Industrial Revolution' develops, it becomes increasingly important for your Company to be able to assess investment opportunities in the innovation-driven changes which are affecting almost every business sector. With this in mind, we have entered into a partnership with Social Capital, one of Silicon Valley's leading technology investment firms, led by Chamath Palihapitiya. We will invest in a range of their funds to benefit from Social Capital's data-driven approach and expertise in this area, as well as looking at specific opportunities. The relationship will be strengthened by Francesco Goedhuis, the Chief Executive of J. Rothschild Capital Management, joining the Advisory Board of Social Capital, and Social Capital will open an office in St. James's Place, where your Company is situated.

### Your Company's Board

As we announced towards the end of July, your Board has been strengthened by the appointment of Philippe Costeletos as a non-executive Director. Philippe has over 25 years' experience in private equity investments, having held senior management roles in TPG Capital and Colony Northstar.

### Dividend

Following the first interim dividend of 16 pence per share paid in April, we have declared a second interim dividend of the same amount. This will be paid on 31 October to shareholders registered on 6 October, and will provide shareholders with a total dividend of 32 pence, a 3.2% increase over 2016.

<sup>1</sup> This stock is held via a co-investment vehicle.

<sup>2</sup> This is a co-investment vehicle with underlying exposure to General Electric, Sysco and Procter & Gamble.

<sup>3</sup> This stock is also held via an equity derivative giving a total exposure of £27.0 million or 1.0%.

<sup>4</sup> These funds are segregated accounts, managed externally on behalf of the Group.

<sup>5</sup> This contains investments with five emerging hedge fund managers, the largest of which is Darsana (£28.6 million).

<sup>6</sup> In relation to interest rate derivatives, as the underlying instruments have different durations, notional exposure is measured in units of a 10-year equivalent bond to allow comparability.

# Notes to the Financial Statements

## 1. Basis of Accounting

These condensed financial statements are the half-yearly consolidated financial statements of RIT Capital Partners plc (the Company) and its subsidiaries (together, the Group) for the six months ended 30 June 2017. They are prepared in accordance with the Disclosure and Transparency Rules of the Financial Conduct Authority, and with International Accounting Standard (IAS) 34, Interim Financial Reporting, as adopted by the European Union, and were approved on 11 August 2017. These half-yearly consolidated financial statements should be read in conjunction with the Report and Accounts for the year ended 31 December 2016, which were prepared in accordance with IFRSs, as adopted by the European Union, as they provide an update of previously reported information.

The half-yearly consolidated financial statements have been prepared in accordance with the accounting policies set out in the notes to the consolidated financial statements for the year ended 31 December 2016. The Income Statement comparative figures reflect the treatment of segregated account fees adopted in the consolidated financial statements at 31 December 2016.

### Critical Accounting Assumptions and Judgements

As further described in the Report and Accounts for the year ended 31 December 2016, areas requiring a higher degree of judgment or complexity and areas where assumptions and estimates are significant to the consolidated financial statements, are in relation to:

- The valuation of property;
- Share-based payments; and
- The valuation of private investments.

Direct private investments are valued at management's best estimate of fair value in accordance with IFRSs, having regard to International Private Equity and Venture Capital Valuation Guidelines as recommended by the British Venture Capital Association. The inputs into the valuation methodologies adopted include observable historical data such as earnings or cash flow as well as more subjective data such as earnings forecasts or discount rates. As a result of this, the determination of fair value requires significant management judgement.

## 2. Business and Geographical Segments

For both the six months ended 30 June 2017 and the six months ended 30 June 2016, the Group is considered to have four principal operating segments as follows:

Segment	Business	AUM £ million <sup>1</sup>	Employees <sup>1</sup>
RIT	Investment trust	–	–
JRCM <sup>2</sup>	Asset manager/ administration	2,771	44
GVQ <sup>3</sup>	Asset manager	709	10
SHL <sup>4</sup>	Events/premises management	–	13

<sup>1</sup> At 30 June 2017.

<sup>2</sup> J. Rothschild Capital Management Limited.

<sup>3</sup> GVQ Investment Management Limited.

<sup>4</sup> Spencer House Limited.

The Group's operations are all based in the UK.

Key financial information for the six months ending 30 June is as follows:

£ million	2017		Profit <sup>2</sup>	2016		Profit <sup>2</sup>

The Board of Directors declared an interim dividend of 16.0 pence per ordinary share (£24.7 million) on 27 February 2017. This amount was paid on 28 April 2017. The Board has declared the payment of a second interim dividend of 16.0 pence per ordinary share (£24.7 million) in respect of the year ending 31 December 2017. This will be paid on 31 October 2017 to shareholders on the register on 6 October 2017.

A more detailed commentary may be found in the Chairman's Statement in the Report and Accounts for the year ended 31 December 2016.

### 6. Financial Instruments

IFRS 13 requires the Group to classify its financial instruments held at fair value using a hierarchy that reflects the significance of the inputs used in the valuation methodologies. These are as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The vast majority of the Group's financial assets and liabilities and the investment properties are measured at fair value on a recurring basis.

The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels at the end of the reporting period when they are deemed to occur.

A description of the valuation techniques used by the Group with regard to investments categorised in each level of the fair value hierarchy is detailed below. Where the Group invests in a fund or a partnership, which is not itself listed on an active market, the categorisation of such investment between levels 2 and 3 is determined by reference to the nature of the underlying investments. If such investments are categorised across different levels, the lowest level that forms a significant proportion of the fund or partnership exposure is used to determine the reporting disclosure.

If the proportion of the underlying investments categorised between levels changes during the period, these will be reclassified to the most appropriate level.

#### Level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price or the last traded price depending on the convention of the exchange on which the investment is quoted. Where a market price is available but the market is not considered active, the Group has classified these investments as level 2.

#### Level 2

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques which maximise the use of observable market data where it is available. Specific valuation techniques used to value OTC derivatives include quoted market prices for similar instruments, counterparty quotes and the use of forward exchange rates to estimate the fair value of forward foreign exchange contracts at the balance sheet date. Investments in externally managed funds which themselves invest primarily in listed securities are valued at the price or net asset value released by the investment manager/fund administrator as at the balance sheet date.

## Notes to the Financial Statements

### 6. Financial Instruments (continued)

#### Level 3

The Group considers all Private Investments, whether direct or funds, as level 3 assets, as the valuations of these assets are not based on observable market data. Where other funds invest into illiquid stocks, these are also considered by the Group to be level 3 assets.

For the private fund investments, fair value is deemed to be the capital statement account balance as reported by the General Partner of the investee fund, and which represents the Group's pro-rata proportion of the fund's net asset value. Where such statements are dated prior to the period end, the valuation is adjusted for subsequent investments or distributions. A review is conducted annually in respect of the valuation basis of the investee funds to confirm these are valued in accordance with fair value methodologies.

The directly held private investments are valued on a semi-annual basis using techniques including a market approach, cost approach and/or income approach. The valuation process involves the finance and investment functions, with the final valuations being reviewed by the Valuation Committee. The specific techniques used will typically include earnings multiples, discounted cash flow analysis, the value of recent transactions and, where appropriate, industry rules of thumb. The valuations will often reflect a synthesis of a number of distinct approaches in determining the final fair value estimate. The individual approach for each investment will vary depending on relevant factors that a market participant would take into account in pricing the asset. These might include the specific industry dynamics, the company's stage of development, profitability, growth prospects or risk as well as the rights associated with the particular security.

Borrowings at 30 June 2017 comprise bank loans and senior loan notes. The bank loans are revolving credit facilities, and are typically drawn in tranches with a duration of three months. The loans are therefore short-term in nature, and their fair value approximates their nominal value. The loan notes were issued in June 2015 with tenors of between 10 and 20 years with a weighted average of 16 years. They are valued on a monthly basis using a discounted cash flow model where the discount rate is derived from the yield of similar tenor UK Government bonds, adjusted for any significant changes in either credit spreads or the perceived credit risk of the Company.

The fair value of investments in non-consolidated subsidiaries is considered to be the net asset value of the individual subsidiary as at the balance sheet date. The net asset values typically comprise various assets and liabilities which are fair valued on a recurring basis and are considered to be level 3.

On a semi-annual basis, the Group engages external, independent and qualified valuers to determine the fair value of the Group's investment properties and property, plant and equipment held at fair value. These were valued at 30 June 2017 by JLL in accordance with the Appraisal and Valuation Manual of the Royal Institution of Chartered Surveyors on the basis of open market value.

The following table analyses the Group's assets and liabilities within the fair value hierarchy at 30 June 2017:

As at 30 June 2017 £ million	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss:				
Portfolio investments	335.0	1,635.0	847.6	2,817.6
Non-consolidated subsidiaries	–	–	9.0	9.0
Investments held at fair value	335.0	1,635.0	856.6	2,826.6
Derivative financial instruments	1.9	37.9	–	39.8
<b>Total financial assets at fair value through profit or loss</b>	<b>336.9</b>	<b>1,672.9</b>	<b>856.6</b>	<b>2,866.4</b>
Non-financial assets measured at fair value:

<b>Total financial liabilities at fair value through profit or loss</b>	<b>(5.5)</b>	<b>(8.5)</b>	<b>(436.4)</b>	<b>(450.4)</b>
<b>Total net assets measured at fair value</b>	<b>331.4</b>	<b>1,664.4</b>	<b>456.2</b>	<b>2,452.0</b>

The realised and unrealised gains and losses shown in the table below for level 3 assets are included in gains/(losses) on fair value investments in the Consolidated Income Statement.

#### Movement in level 3 assets

Period ended 30 June 2017 £ million	Investments held at fair value	Investment Property	Total
Opening Balance	977.7	35.5	1,013.2
Purchases	28.7	–	28.7

## Regulatory Disclosures

---

### Statement of Directors' Responsibilities

In accordance with the Disclosure and Transparency Rules 4.2.4R, 4.2.7R and 4.2.8R, we confirm that to the best of our knowledge:

- (a) The condensed set of financial statements has been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting, as adopted by the European Union, as required by the Disclosure and Transparency Rule 4.2.4R;
- (b) The Chairman's Statement includes a fair review of the information required to be disclosed under the Disclosure and Transparency Rule 4.2.7R, interim management report. This includes an indication of important events that have occurred during the first six months of the financial year, and their impact on the condensed set of financial statements presented in the Half-Yearly Financial Report. A description of the principal risks and uncertainties for the remaining six months of the financial year is set out below; and
- (c) In addition, in accordance with the disclosures required under the Disclosure and Transparency Rule 4.2.8R, there were no changes in the transactions or arrangements with related parties as described in the Group's Report and Accounts for the year ended 31 December 2016 that would have had a material effect on the financial position or performance of the Group in the first six months of the current financial year.

### Principal Risks and Uncertainties

The principal risks and uncertainties facing the Group for the second half of the financial year are substantially the same as those described in the Report and Accounts for the year ended 31 December 2016. These comprise:

- Investment Strategy Risk;
- Market Risk;
- Liquidity Risk;
- Credit Risk;
- Key Person Dependency;
- Legal & Regulatory Risk; and
- Operational Risk.

As with any investment company, the main risk is considered to be market risk.

### Going Concern

The factors likely to affect the Group's ability to continue as a going concern were set out in the Report and Accounts for the year ended 31 December 2016. As at 30 June 2017, there have been no significant changes to these factors. Having reviewed the Company's forecasts and other relevant evidence, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the half-yearly condensed financial statements.

### **Warning to Shareholders**

From time to time investment companies and their shareholders can be the subject of investment scams. The perpetrators obtain lists of shareholders and make unsolicited phone calls or correspondence concerning investment matters, typically from overseas. They may offer to sell worthless or high risk shares or, in the case of your RIT Capital Partners plc stock, may offer to buy your current shareholdings at an unrealistic price. They will often also inform you of untrue scenarios to make you think that you need to sell your shares or to justify an offer that seems too good to be true. To find out more about share fraud or 'boiler room' scams please visit the website of the Financial Conduct Authority.

Please note we will never contact you by phone unless you have requested us to do so, nor will our registrars, Computershare. In the event that you are contacted we strongly recommend that you review the FCA website above and follow the necessary steps.
