

About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

31 January 2025 NAV and commentary

RIT's unaudited diluted NAV at 31 January 2025 (with debt at fair value) was 2,682p per £1 ordinary share (31 December 2024: 2,614p), +2.6% from the previous month. Over the same period, the Company's two indices, CPI plus 3% and the ACWI (50% £) were up +0.5% and +3.6% respectively.

Global equity markets rebounded in January, recovering from December losses amid a favourable macroeconomic backdrop of moderating inflation and solid GDP growth. The US market underperformed the rest of the world by the greatest extent in 25 months, as the market weighed the impact of the policies of the new Trump administration.

European equities extended their December gains, supported by positive economic data showing a resilient labour market and improving forward-looking indicators. Commodities also rose, led by gains in precious metals.

Against this backdrop, our portfolio performed well during the month, driven primarily by Quoted Equities, with positive returns from both Private Investments and Uncorrelated Strategies.

Highlights:

- The value of our Quoted Equities book increased meaningfully. Contributors in directly held stocks included Quality companies and SMID-cap stocks, while our specialist managers performed well in China and Healthcare themes.
- Private Investments also rose in value after we received the initial fourth quarter valuations from our fund investments. We also saw gains from the sale of a direct private investment, Xapo Bank, the first regulated cryptocurrency bank globally, at a sizeable uplift to its most recent valuation. As of 31 January, 10% of our private funds were held at 31 December reported valuations, with the remainder held at 30 September reported valuations.
- Uncorrelated Strategies contributed to our NAV, with gains from absolute return strategies and gold, which reached an all-time high in January. These gains were offset by modest detraction from our exposure to Carbon Credits.
- Currencies benefited our NAV during the month, primarily due to the US dollar's appreciation against sterling, which led to positive translation impacts for our portfolio.
- We continued our ongoing share buyback programme, repurchasing £1.6 million or approximately 80,000 shares in January.

A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

Our global portfolio is diversified across three primary strategic pillars – Quoted Equities, Private Investments and Uncorrelated Strategies - always with a long-term view and focus on risk management.

Risk warnings

Please refer to page five for important information regarding risk warnings.

Performance since inception

£10,000 invested in RIT at inception in 1988 would be worth ~£376,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £)³ which would be worth ~£153,000.

A well-balanced, diversified portfolio across three main pillars

Quoted Equities

Diversified, global high-conviction strategies held directly through stocks, as well as public equity funds.

We target high-conviction investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our internal team or through our network of exceptional, specialist managers.

30 – 60% NAV

Long-term allocation range

Private Investments

High-quality assets in private markets, held through both direct investments and specialist managers.

We target high-quality assets in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns.

20 – 40% NAV

Long-term allocation range

Uncorrelated Strategies

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

20 – 40% NAV

Long-term allocation range

Asset allocation (% NAV)

Currency exposure (% NAV)⁸

Geographical exposure (% NAV)⁹

Further Information

Sustainability

Footnotes:

- As of 31 January 2025. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988.
- Using 31 January 2025 CPI data.
- The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in Sterling and 50% measured in a Sterling hedged ACWI. The Sterling hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies.

- Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.
- Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.3%, representing an estimate of publicly-traded equities held indirectly in Private investment funds, based upon the latest available fund valuations at December 2024.
- As of 31 December 2024. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. See RIT's Annual Report & Accounts (ARA) for further detail.

- Gearing is calculated in accordance with AIC guidance as total assets, excluding cash, divided by net assets. Refer to p.133 in the ARA for further detail.
- As of 31 January, 10% of our private funds were held at 31 December valuations and 90% at 30 September valuations.
- Excluding currency options.
- Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to North America, Europe and Emerging Markets increases by 9%, 3% and less than 1%, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.
