

About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

30 April 2025 NAV and commentary

RIT's unaudited diluted NAV at 30 April 2025 (with debt at fair value) was 2,595p per £1 ordinary share (31 March 2025: 2,599p), following the payment of a 21.5p interim dividend in April. This represents a +0.7% total return for the month, outperforming the ACWI (50% £), which was -1.4%. YTD RIT's NAV per share total return was +0.1%, outperforming the ACWI (50% £), which was -4.4%.

April was the third most volatile month for global stocks and the second worst month for the US dollar in the last 10 years. Gold was a bright spot, rising over 5%. In the US, the Liberation Day tariffs announcement triggered a sell-off early in the month. Markets then recovered after Trump announced a 90-day pause, despite weak economic data and consumer confidence. Europe ended the month marginally down while China underperformed.

Against this backdrop, our portfolio outperformed, driven by strong gains in Private Investments following the SPAC merger of Webull, a digital investment and trading platform. Quoted Equities remained resilient, being marginally down, while Uncorrelated Strategies were flat.

The continued strengthening of the sterling against the US dollar by +3.4% resulted in a negative translation effect for our global portfolio.

Highlights:

- Quoted Equities detracted modestly from our NAV. Our core managers in Japan as well as our quality theme performed well. This was offset by weakness in our China exposures and cyclically sensitive stocks, as economic and political uncertainty rose post Liberation Day.
- Private Investments were significantly additive to our NAV following the Webull SPAC merger at a material uplift to our carrying value. Fund investments also contributed positively, benefiting from higher first quarter valuations for some of our largest positions. As of 30 April, 30% of private funds were held at 31 March 2025 reported valuations and 69% at 31 December 2024 reported valuations.
- Uncorrelated Strategies were flat in the month, with positive contributions from gold offset by declines in credit strategies.
- Currencies detracted meaningfully from our NAV, primarily due to the impact of currency translation on our global portfolio.
- We continued our ongoing share buyback programme, repurchasing £13.7 million or approximately 750,000 shares in April. This was the largest monthly buyback since August 2023.

A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

Our global portfolio is diversified across three primary strategic pillars – Quoted Equities, Private Investments and Uncorrelated Strategies – always with a long-term view and focus on risk management.

Risk warnings

Please refer to page five for important information regarding risk warnings.

Performance since inception

£10,000 invested in RIT at inception in 1988 would be worth ~£363,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £)³ which would be worth ~£141,000.

A well-balanced, diversified portfolio across three main pillars

Quoted Equities

Diversified, global high-conviction strategies held directly through stocks, as well as public equity funds.

We target high-conviction investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our internal team or through our network of exceptional, specialist managers.

30 – 60% NAV

Long-term allocation range

Private Investments

High-quality assets in private markets, held through both direct investments and specialist managers.

We target high-quality assets in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns.

20 – 40% NAV

Long-term allocation range

Uncorrelated Strategies

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

20 – 40% NAV

Long-term allocation range

Asset allocation (% of NAV)

Currency exposure (% NAV)⁸

Geographical exposure (% NAV)⁹

Footnotes:

1. As of 30 April 2025. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988.
2. Using 31 March 2025 CPI data.
3. The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in Sterling and 50% measured in a Sterling hedged ACWI. The Sterling hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies.

4. Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.
5. Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.0%, representing an estimate of publicly-traded equities held indirectly in Private investment funds, based upon the latest available fund valuations at March 2025.
6. As of 31 December 2024. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. See RIT's Annual Report & Accounts (ARA) for further detail.

7. Gearing is calculated in accordance with AIC guidance as total assets, excluding cash, divided by net assets. Refer to p.133 in the ARA for further detail.
8. As of 30 April, 30% of our private funds were held at 31 March valuations, 69% at 31 December valuations and 1% at 30 September valuations.
9. Excluding currency options.
10. Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to North America, Europe and Emerging Markets increases by 7%, 4% and less than 1%, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up. The information contained in this document should in no circumstances be considered as advice or an investment recommendation and you should only consider investments that are right for you. If you are in any doubt about the suitability of an investment, you should speak to an independent financial adviser. Before investing in RIT shares, we strongly recommend you read the documentation in the Regulatory Disclosures section of the website, which contains key information.
