

About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

31 May 2025 NAV and commentary

RIT's unaudited diluted NAV at 31 May 2025 (with debt at fair value) was 2,617p per £1 ordinary share (30 April 2025: 2,595p), +0.9% from the previous month. As a result, the YTD NAV per share total return was 1.0%, outperforming the ACWI (50% £) at +0.6%, with CPI +3% at +2.7%.

Global equities rose during the month, with developed markets outperforming emerging markets for the first time since January. A temporary easing of US-China trade tensions drove a rebound in US equities, led by technology, while healthcare declined. US consumer confidence saw its biggest increase in four years and inflation pressures eased.

In Europe, macro data remained mixed and US-EU trade tensions persisted. Inflation eased and European equities gained across all major regions. Asian equities also rose, led by Japan, while China lagged.

Outside of equities, bond yields moved higher. Markets now expect around two Fed rate cuts in 2025, starting in Q3. Commodities fell overall, while gold was flat.

Against this backdrop, our portfolio posted a positive performance, driven by gains in Quoted Equities and a modest contribution from Private Investments. Uncorrelated Strategies detracted from our NAV, while the weakness of the US dollar remained a headwind for our global portfolio.

Highlights:

- Quoted Equities added meaningfully to our NAV, driven by our quality and technology holdings, with healthy contributions from specialist managers focused on Japan. China, Cyclical and SMID-cap stocks were additive, while healthcare detracted, reflecting uncertainty surrounding potential US changes to drug pricing and regulatory approvals.
- Private Investments were additive to our NAV, following receipt of further first quarter valuations for our fund investments. As of 31 May, 93% of private funds were held at 31 March 2025 reported valuations and 6% at 31 December 2024 reported valuations. In line with our valuation policy, our direct investments will be revalued as of 30 June.
- Uncorrelated Strategies detracted from our NAV, as decreases in real assets and government bonds outweighed gains in our absolute return and credit strategies.
- Currencies detracted meaningfully from our NAV, primarily due to further strengthening of sterling against the US dollar, leading to a negative translation effect for our portfolio.
- We continued our ongoing share buyback programme, repurchasing £9.7 million or approximately 500,000 shares in May.

A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

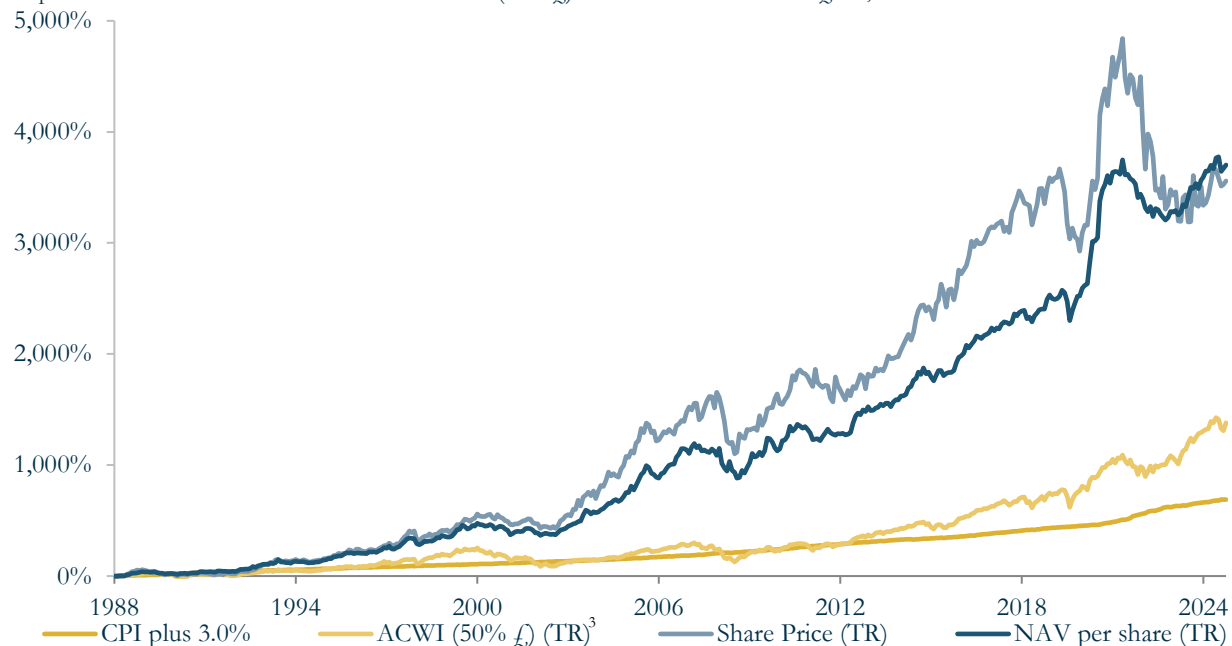

Our global portfolio is diversified across three primary strategic pillars – Quoted Equities, Private Investments and Uncorrelated Strategies – always with a long-term view and focus on risk management.

Risk warnings

Please refer to page five for important information regarding risk warnings.

Performance since inception

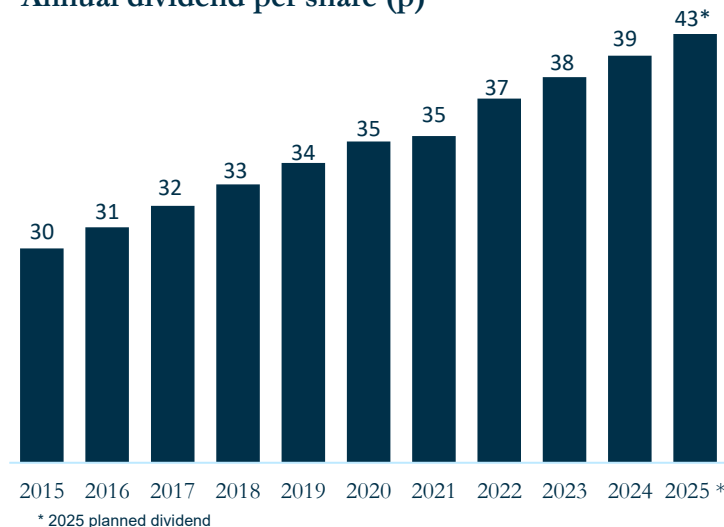

£10,000 invested in RIT at inception in 1988 would be worth ~£366,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £) (TR)³ which would be worth ~£148,000.

A well-balanced, diversified portfolio across three main pillars

Quoted Equities

Diversified, global high-conviction strategies held directly through stocks, as well as public equity funds.

We target high-conviction investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our internal team or through our network of exceptional, specialist managers.

30 – 60% NAV

Long-term allocation range

Private Investments

High-quality assets in private markets, held through both direct investments and specialist managers.

We target high-quality assets in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns.

20 – 40% NAV

Long-term allocation range

Uncorrelated Strategies

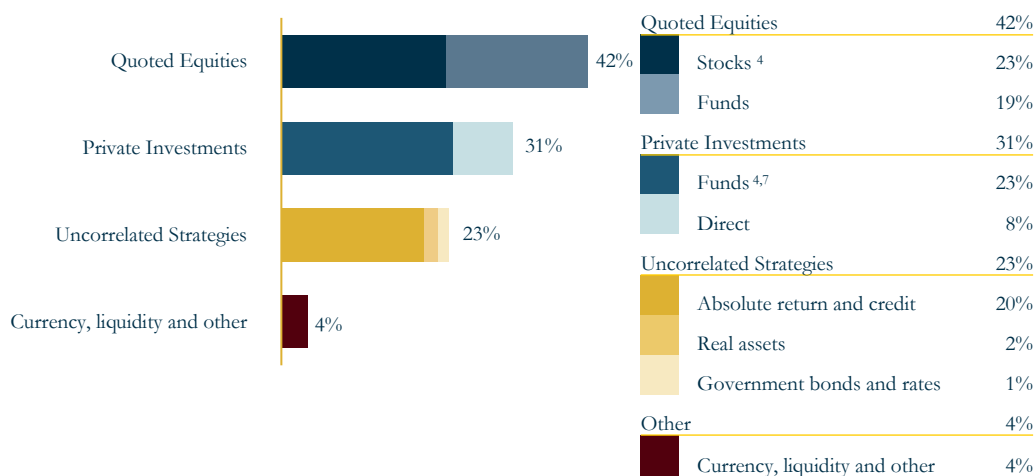

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

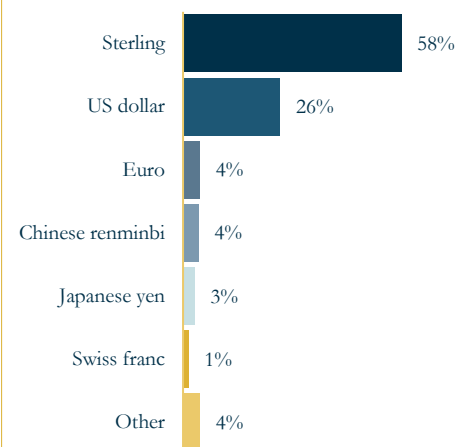

20 – 40% NAV

Long-term allocation range

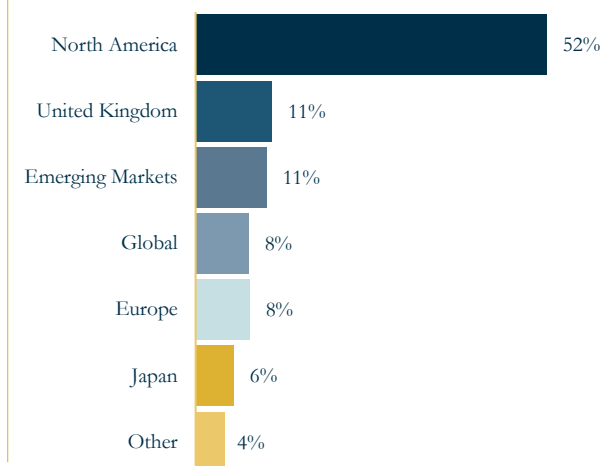

Asset allocation (% of NAV)

Currency exposure (% NAV)⁸

Geographical exposure (% NAV)⁹

Further Information

Footnotes:

1. As of 31 May 2025. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988.
2. Using 30 April 2025 CPI data.
3. The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in Sterling and 50% measured in a Sterling hedged ACWI. The Sterling hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies.

4. Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.
5. Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.0%, representing an estimate of publicly-traded equities held indirectly in Private investment funds, based upon the latest available fund valuations at March 2025.
6. As of 31 December 2024. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. See RIT's Annual Report & Accounts (ARA) for further detail.

7. Gearing is calculated in accordance with AIC guidance as total assets, excluding cash, divided by net assets. Refer to p.133 in the ARA for further detail.
8. As of 31 May, 93% of private funds were held at 31 March 2025 reported valuations and 6% at 31 December 2024 reported valuations.
9. Excluding currency options.
10. Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to North America, Europe and Emerging Markets increases by 7%, 4% and less than 1%, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up. The information contained in this document should in no circumstances be considered as advice or an investment recommendation and you should only consider investments that are right for you. If you are in any doubt about the suitability of an investment, you should speak to an independent financial adviser. Before investing in RIT shares, we strongly recommend you read the documentation in the Regulatory Disclosures section of the website, which contains key information.
