

## About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

## 30 November 2025 NAV Commentary

RIT's unaudited diluted NAV as at 30 November 2025 (with debt at fair value) was 2,899p per £1 ordinary share (31 October 2025: 2,903p), -0.1% from the previous month and outperforming the ACWI (50% £), which was -0.4% (UK CPI plus 3%: +0.6%). YTD RIT's NAV per share total return was +12.7%.

Global equities declined in November for the first time since March, with Emerging Markets dragging on performance and investors unwinding AI-related positions amid concerns around valuations.

In the United States, markets were influenced by the record 43-day government shutdown, which delayed key economic data releases and created uncertainty. This was reflected in US equity markets, which showed mixed performance with declines across AI-related technology stocks, while defensive sectors such as healthcare outperformed.

Across Europe, economic and geopolitical conditions were broadly stable. The UK drew particular attention as the Bank of England and Autumn Budget took centre stage. Despite a more dovish tone from policymakers and a budget that avoided major surprises, UK equities were essentially flat for the month. In Asia, equity markets recorded their weakest month since late 2024, reversing some of their strong year to date performance. Meanwhile, global bond markets remained stable, sterling strengthened following the UK Budget, and a continued rally in gold led a broader recovery in commodity markets.

Against a challenging backdrop, RIT delivered a resilient performance, demonstrating the benefits of our diversified global portfolio. Performance was led by gains in Private Investments and Uncorrelated Strategies, which were offset by a decline from the Quoted Equities book and negative currency effects.

## Highlights:

- Quoted Equities detracted modestly from our NAV, as weakness in technology and Chinese stocks was balanced by strong performance in more defensive holdings including biotech and life sciences.
- Private Investments delivered positive returns, bolstered further by the receipt of solid third quarter valuations for some of our largest fund investments. As at 30 November, 97% of the funds portfolio is held at the 30 September 2025 reported valuations, with the majority of the remaining balance at 30 June 2025. In line with our valuation policy, our direct investments will be revalued as at 31 December.
- Uncorrelated Strategies, which acts as a steady diversifier of returns, performed well, reflecting gains in gold and robust performance from absolute return strategies.
- Currencies detracted from our NAV, primarily due to further strengthening of sterling against the US dollar, leading to a negative translation effect for our portfolio.
- We continued our share buyback programme, repurchasing £9.1m or approximately 420,000 shares in November. YTD, we have bought back approximately £75.6m of shares adding an estimated accretion benefit of +76bps of NAV.

## A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

## Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

## A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

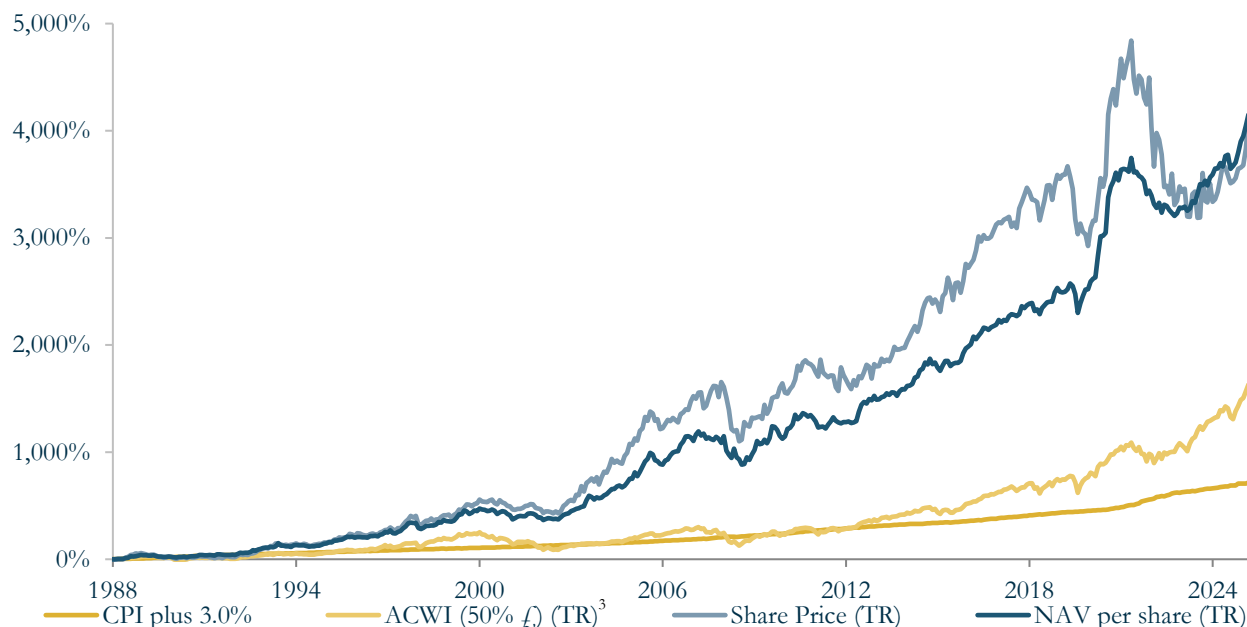

Our global portfolio is diversified across three primary strategic pillars - Quoted Equities, Private Investments and Uncorrelated Strategies - always with a long-term view and focus on risk management.

## Risk warnings

Please refer to page five for important information regarding risk warnings.

## Performance since inception

£10,000 invested in RIT at inception in 1988 would be worth ~£431,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £)³ which would be worth ~£172,000.

## A well-balanced, diversified portfolio across three main pillars

### Quoted Equities

Diversified, global, and high conviction strategies held directly through stocks, as well as public equity funds.

We target high-conviction investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our internal team or through our network and exceptional specialist managers.

30 – 60% NAV

Long-term allocation range

### Private Investments

High-quality assets in private markets, held through both direct investments and specialist managers.

We target high-quality assets in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns.

20 – 40% NAV

Long-term allocation range

### Uncorrelated Strategies

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

20 – 40% NAV

Long-term allocation range

### Asset allocation (% NAV)

### Currency exposure (% NAV)<sup>8</sup>

### Geographical exposure (% NAV)<sup>9</sup>

## Further Information

### Sustainability

A commitment to sustainability and ESG issues is a core focus of both our Board and our manager, J. Rothschild Capital Management Limited. Read about our approach to responsible investing on our website: [www.ritcap.com/about-us/sustainability](http://www.ritcap.com/about-us/sustainability)

### Portfolio case studies

Our case study series offers a window into some of the opportunities we have invested in – both existing and realised. Read about our portfolio in action on our website: [www.ritcap.com/case-studies](http://www.ritcap.com/case-studies)

### Footnotes:

1. As of 30 November 2025. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988.
2. Using 31 October 2025 CPI data.
3. The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in Sterling and 50% measured in a Sterling hedged ACWI. The Sterling hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies. Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.

4. Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.0%, representing an estimate of publicly-traded equities held indirectly in Private investment funds, based upon the latest available fund valuations as at September 2025.
5. As of 31 December 2024. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. See RIT's Annual Report & Accounts (ARA) for further detail.
6. Gearing is calculated in accordance with AIC guidance as total assets, excluding cash, divided by net assets. Refer to p.133 in the ARA for further detail.

7. As at 30 November, 97% of the funds portfolio is held at 30 September 2025 reported valuations, with the majority of the remaining balance at 30 June 2025.
8. Excluding currency options.
9. Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to Europe, Global and North America increases by 1%, less than 1% and less than 1%, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up. The information contained in this document should in no circumstances be considered as advice or an investment recommendation and you should only consider investments that are right for you. If you are in any doubt about the suitability of an investment, you should speak to an independent financial adviser. Before investing in RIT shares, we strongly recommend you read the documentation in the Regulatory Disclosures section of the website, which contains key information.
