

## About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

## 31 December 2025 NAV Commentary

RIT's audited diluted NAV as at 31 December 2025 (with debt at fair value) was 2,921p per £1 ordinary share (30 November 2025: 2,899p). This represents a +0.8% total return for the month, outperforming the ACWI (50% £) at +0.1%.

Global equities were largely flat in December, led by emerging markets, reflecting a rotation of investor sentiment away from large-cap US stocks, towards more cyclical sectors and non-US markets.

US shares lagged global markets as gains spread from large technology companies to more economically sensitive sectors. European equities performed well, supported by steady economic growth and lower inflationary pressures, while Asian equities rallied.

The US dollar continued its downtrend in December, while commodities showed mixed performance, with metals prices rising and energy prices falling.

RIT delivered resilient performance, demonstrating the benefits of our diversified global portfolio. Performance was led by Private Investments and Uncorrelated Strategies. Quoted Equities detracted modestly during the month, while the continued strengthening of sterling against the US dollar resulted in a negative translation effect on our global portfolio.

## Highlights:

- In Quoted Equities, weakness in technology and biotech stocks was partially offset by strong performance in our quality theme and emerging markets related holdings.
- Private Investments delivered positive returns, helped by an uplift in December valuations of our direct holdings. As of 31 December 2025, more than 99% of our private funds were held at 30 September 2025 reported valuations and all private direct holdings were valued as at 31 December 2025, in line with our valuation policy.
- Uncorrelated Strategies, which acts as a steady diversifier of returns, contributed positively to our NAV, supported by gold and credit.
- Currencies detracted from our NAV, primarily due to further strengthening of sterling against the US dollar, leading to a negative translation effect for our portfolio.
- We continued our share buyback programme, buying back £13.4m or approximately 593,000 shares in December, adding an estimated +9bps accretion to NAV. As at 31 December 2025, the total share capital repurchased through buybacks since the start of the year amounted to 3% at a total value of £89.0m.

## A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

## Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

## A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

Our global portfolio is diversified across three primary strategic pillars - Quoted Equities, Private Investments and Uncorrelated Strategies - always with a long-term view and focus on risk management.

## Risk warnings

Please refer to page five for important information regarding risk warnings.

## Performance since inception

£10,000 invested in RIT at inception in 1988 would be worth ~£442,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £)<sup>3</sup> which would be worth ~£173,000.

## A well-balanced, diversified portfolio across three main pillars

### Quoted Equities

Diversified, global strategies held directly through stocks, as well as public equity funds.

We target diversified, global investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our in-house investment expertise or through our network and specialist external managers.

30 – 60% NAV

Long-term allocation range

### Private Investments

Investments in private markets, held through both direct investments and specialist managers.

We target investments in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns, and typically structured to provide some downside protection.

20 – 40% NAV

Long-term allocation range

### Uncorrelated Strategies

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

20 – 40% NAV

Long-term allocation range

### Asset allocation (% NAV)

### Currency exposure (% NAV)<sup>8</sup>

### Geographical exposure (% NAV)<sup>9</sup>

## Further Information

### Sustainability

A commitment to sustainability and ESG issues is a core focus of both our Board and our manager, J. Rothschild Capital Management Limited. Read about our approach to responsible investing on our website: [www.ritcap.com/about-us/sustainability](http://www.ritcap.com/about-us/sustainability)

#### Footnotes:

- As of 31 December 2025. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988.
- Using 31 December 2025 CPI data.
- The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in Sterling and 50% measured in a Sterling hedged ACWI. The Sterling hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies. Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.
- Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.3%, representing an estimate of publicly-traded equities held indirectly in private investment funds, based upon the latest available fund valuations as at September 2025.
- As of 31 December 2025. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. Refer to p.133 in the 2025 Annual Report and Accounts (ARA) for further detail.
- Gearing is calculated in accordance with AIC guidance as total assets, excluding cash, divided by net assets. Refer to p.133 in the 2025 ARA for further detail.
- As at 31 December, over 99% of the funds portfolio is held at 30 September 2025 reported valuations, with the balance at 30 June 2025.
- Excluding currency options.
- Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to Europe and global increases by 2% and less than 1%, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up. The information contained in this document should in no circumstances be considered as advice or an investment recommendation and you should only consider investments that are right for you. If you are in any doubt about the suitability of an investment, you should speak to an independent financial adviser. Before investing in RIT shares, we strongly recommend you read the documentation in the Regulatory Disclosures section of the website, which contains key information.
