

## About RIT

RIT Capital Partners plc (RIT) is listed on the London Stock Exchange's FTSE 250 Index and is one of the UK's largest investment trusts. RIT is managed by its wholly-owned subsidiary, J. Rothschild Capital Management Limited (JRCM).

Our purpose is to grow your wealth meaningfully over time, through a diversified and resilient global portfolio. RIT is therefore best thought of as a core diversifier and part of a portfolio's global equity exposure.

## NAV Commentary

RIT's unaudited diluted NAV as at 31 March 2026 (with debt at fair value) was 2,967p per £1 ordinary share (28 February 2026: 3,026p), -1.9% for the month.

YTD to 31 March, RIT's NAV per share total return is +1.6%.

Global markets experienced a sharp reversal in March as escalating geopolitical tensions in the Middle East induced a broad risk-off move across various asset classes.

Against this backdrop, our diversified global portfolio delivered a resilient performance, participating in only 33% of the ACWI (50% £) downside in March having delivered 87% of the upside to end February. Overall, the portfolio generated a positive return for the first quarter of 2026, whilst the ACWI (50% £) declined over the same period.

- Quoted Equities declined in March, with commodity-related equities and Emerging Markets reversing outperformance from earlier in the year. Timely profit-taking in gold miners and Emerging Markets early in the month reduced the downside impact. Mindful of the risks surrounding events in the Middle East, our reduced exposure positions us to deploy capital on any further weakness in quoted equity markets.
- Private Investments generated positive returns in March and YTD, following receipt of additional fourth-quarter fund valuations. Strong fund distributions also supported new commitments to some of our largest specialist fund partners. The outlook remains constructive, supported by positive developments across a number of our key holdings, with Anthropic and Databricks completing financing rounds, while Brex was acquired by Capital One, all at valuations above our current holding values in the NAV. SpaceX, one of our top ten positions, has reported plans for a U.S. initial public offering as early as mid-2026 at a valuation materially higher than our current holding value, should it proceed.
- Uncorrelated Strategies fell modestly for the month with negative contributions from gold partially offset by a position in oil, established ahead of the outbreak of hostilities in the Middle East. The pillar remains a steady diversifier of returns, additive overall to NAV YTD.
- Performance was further supported by US dollar strength against sterling.

During March we repurchased £12.6m or approximately 582,000 shares. This brings YTD to approximately 1.3m shares or £28.1m, adding an estimated +0.25% accretion to NAV returns.

## A distinctive approach

Our key differentiators are our unrivalled network, internal expertise and flexible investment mandate. These enable us to source and underwrite high-quality, often hard-to-access investments, and implement them in a capital efficient way across asset classes and geographies.

## Long-term investing

Above all, our approach is long term. We aim to deliver compelling growth through market cycles and superior long-term performance, with less risk than equity markets.

## A well-balanced, unique portfolio

Each of our investments is meticulously chosen, structured and monitored to create a unique, high-conviction, balanced portfolio. Where every position matters but none has a disproportionate impact on returns. And where returns compound over time.

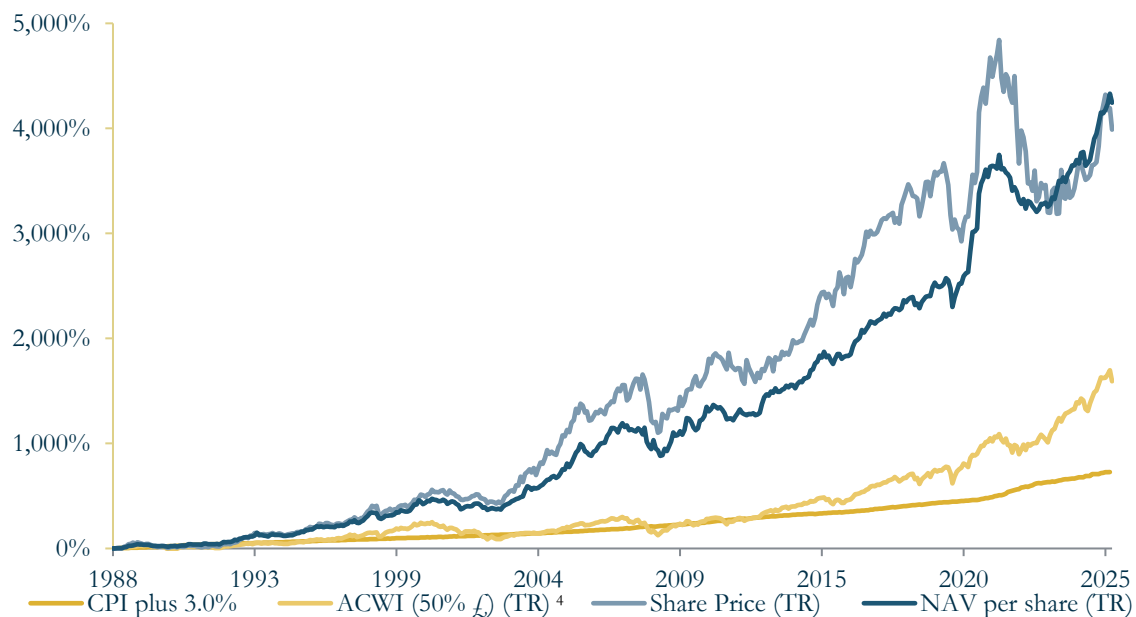

Our global portfolio is diversified across three primary strategic pillars - Quoted Equities, Private Investments and Uncorrelated Strategies - always with a long-term view and focus on risk management.

## Risk warnings

Please refer to page five for important information regarding risk warnings.

## Performance since inception

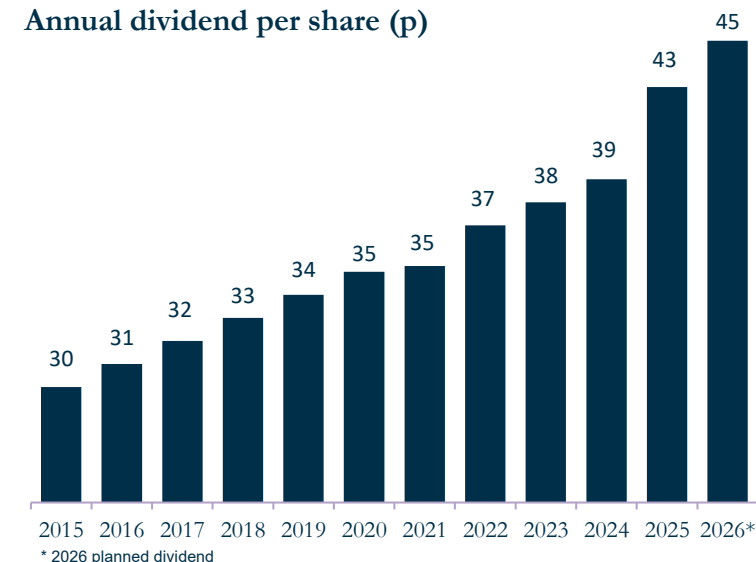

£10,000 invested in RIT at inception in 1988 would be worth ~£409,000 today (with dividends reinvested) compared to the same amount invested in the ACWI (50% £)⁴ which would be worth ~£169,000.

## A well-balanced, diversified portfolio across three main pillars

### Quoted Equities

Diversified, global strategies held directly through stocks, as well as public equity funds.

We target diversified, global investments in listed equity markets, aiming for returns that outperform relevant equity market indices. We source these investments either directly through our in-house investment expertise or through our network and specialist external managers.

30 – 60% NAV

Long-term allocation range

### Private Investments

Investments in private markets, held through both direct investments and specialist managers.

We target investments in private markets, aiming to generate double-digit compound returns over the long term. These investments have been a compelling source of returns, and typically structured to provide some downside protection.

20 – 40% NAV

Long-term allocation range

### Uncorrelated Strategies

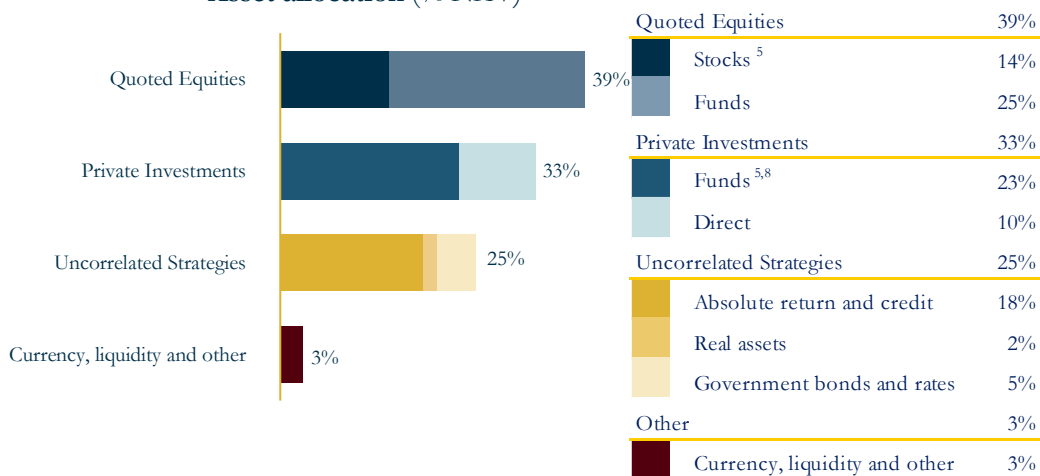

A mix of strategies which aim to generate consistent returns in different market conditions, with a lower correlation to equity markets across the cycle.

Underlying investments in this pillar are in traded instruments primarily focused on absolute return strategies (including market neutral and macro managers), credit investments, and some real assets and government bonds. We access most of these strategies through specialist external managers or co-investments.

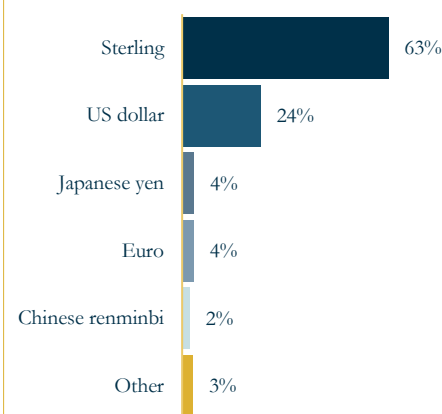

20 – 40% NAV

Long-term allocation range

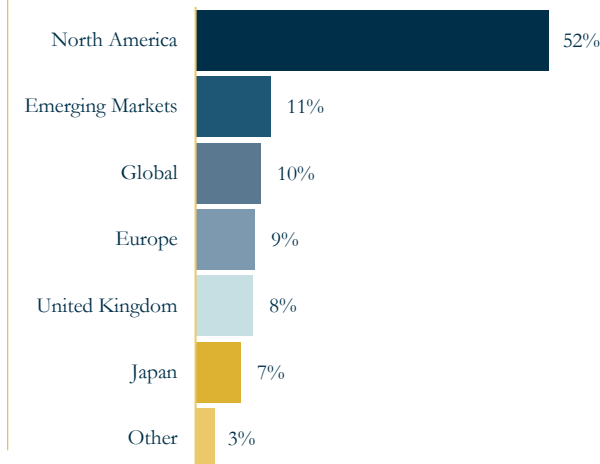

### Asset allocation (% NAV)

### Currency exposure (% NAV)<sup>9</sup>

### Geographical exposure (% NAV)<sup>10</sup>

## Further Information

### Sustainability

A commitment to sustainability and ESG issues is a core focus of both our Board and our manager, J. Rothschild Capital Management Limited. Read about our approach to responsible investing on our website: [www.ritcap.com/about-us/sustainability](http://www.ritcap.com/about-us/sustainability)

### Portfolio case studies

Our case study series offers a window into some of the opportunities we have invested in – both existing and realised. Read about our portfolio in action on our website: [www.ritcap.com/case-studies](http://www.ritcap.com/case-studies)

#### Footnotes:

- As of 31 March 2026. The since inception return is calculated using the NAV per share and closing share price at 2 August 1988, with dividends reinvested.
- All total return performance figures are with dividends reinvested, excluding 2026 YTD performance numbers.
- Using 28 February 2026 CPI data.
- The ACWI refers to the MSCI All Country World Index and is calculated using 50% of the index measured in sterling and 50% measured in a sterling-hedged ACWI. The sterling-hedged ACWI is used as it incorporates hedging costs, which the portfolio also incurs, to protect against currency risk. It is applied from 1 January 2015 (from when it is readily available), and prior to this date it uses the index measured in local currencies.

Before December 1998, when total return indices were introduced, the index is measured using a capital-only version.

- Included in Quoted Equity stocks and excluded from Private Investments funds is an adjustment of 4.1%, representing an estimate of publicly-traded equities held indirectly in private investment funds, based upon the latest available fund valuations as at December 2025.
- As of 31 December 2025. This is RIT's own ongoing charges figure (OCF), calculated based on recommendations from the Association of Investment Companies and excluding performance-related amounts as well as costs incurred within third-party funds. Refer to p.133 in the 2025 Annual Report and Accounts (ARA) for further detail.
- Gearing is calculated in accordance with AIC guidance as total assets,

excluding cash, divided by net assets. Refer to p.133 in the 2025 ARA for further detail.

- As at 31 March, 90% of the funds portfolio is held at 31 December 2025 reported valuations, with the balance at 30 September 2025.
- Excluding currency options.
- Excludes the notional exposure from derivatives. When factoring in the exposure from equity futures and equity swaps, the exposure to Europe, Emerging Markets, North America and global increases by 2% and less than 1% for the latter three, respectively.

**Risk warnings**

Past performance is no indication of future performance. The price of shares and income from them can rise and fall so investors could get back less than they originally invested or nothing at all. Net Asset Value (“NAV”) performance is not the same as share price performance and investors may not realise returns in line with NAV performance. Exchange rate changes may cause the value of underlying overseas investments to go down as well as up. This document may contain forward-looking statements with respect to the financial condition, performance and position, strategy, results of operations and businesses of RIT. Such statements are based on current expectations and assumptions and involve known and unknown risks and uncertainties.
